FRUCT News Letter
October 2010

Welcome to 8th FRUCT conference and trainings

We welcome you to take part in the 8th FRUCT conference that will be held in Lappeenranta on November 9-12, 2010. The conference consists of 2,5 days of scientific and educational presentations and lectures, plus 3 hands-on trainings on MeeGo platform, Smart-M3 platform, and Platform Security. The conference program has been published (PDF, html). The conference and trainings are free of charge, but number of sits is limited and requires on-line registration at FRUCT web site (separate registration to the conference and trainings). For more information please visit the conference page: http://fruct.org/conference8 and follow us in twitter by the hashtag #FRUCT8.

Symbian Mobile Device Energy Spending Contest

We welcome you to take a part in R&D challenge in field of Energy and Power Management. The target is to develop Symbian application that **maximizes** energy consumption of a mobile device. The winner will get FRUCT diploma, invitation to present paper at one of the following FRUCT events, Nokia N95 8Gb smartphone. Application deadline is December 12, 2010. More details at http://fruct.org/contest.

Congratulations to the winner Qt contest in India

On behalf of the contest organizing committee and FRUCT we congratulate winner of FRUCT Qt contest in India: The Maemo-Muxic project (team Lepakshi.G.R, Sushma.N.M, Swati.R (SJCE, Mysore). We also would like to thank all contest participants for your efforts and good results. The list of contest works and the discussion are published here.

About FRUCT

FRUCT is an open-innovation framework for strategic R&D cooperation between industry and universities. The program was established in 2007 by Nokia Research Center, Saint-Petersburg University of Airspace Instrumentation and University of Turku and has by now become the most significant and actively growing cooperation framework between leaders of ICT industry and universities in the Baltic region. The FRUCT principle is in removing cooperation entering thresholds by setting R&D projects run by students under direct joint tutoring of industrial and academic experts. The FRUCT activities are sponsored by Nokia and Nokia Siemens Networks.
