Smart Space Working Group Mission

Mission of the Smart Space Working Group is as follows:

- Creation and prototyping of solutions based on principles of the **smart spaces paradigm** and ubiquitous computing
- Development and promotion of the **smart space solutions** for the users of **mobile devices**
- Analysis and creation of the corresponding **use cases** and **business models**
- Elaboration of other competences to provide competitive advantages for the work group members at the emerging market of **smart spaces services**

At the moment all activities of the working group are related to **Smart-M3** platform that has been developed by the Artemis JU programme in Sofia and in Finnish national DIEM project

Smart Space Working Group Members

- Sergey Balandin (FRUCT, WG co-chair)
- Jukka Honkola (Innorange, WG co-chair)
- Alexey Kashevnik (SPIIRAS, WG secretary)
- Pekka Jappinen (LUT)
- Alfredo D'Elia (UniBo)
- Yury Korolev (SPbETU)
- Dmitry Korzun (PetrSU)
- Kirill Krinkin (SPbETU)
- ~~Evgeny Linsky (SUAI)~~
- ~~Alexander Malahov (SUAI)~~
- Ilya Paramonov (YarSU)
- ~~Luca Roffia (Bologna University)~~
- Andrew Vasilev (YarSU)
- Kirill Yudenok (SPbETU)

- Michel Banatre (IRISA)
- **Tatiana Efimushkina (TUT)**
- Vladimir Gorodetsky (SPIIRAS)
- Alexey Koren (SUAI)
- **Evgeny Linsky (SUAI)**
- Vesa Luukkala (Nokia)
- Jari Porras (LUT)
- **Luca Roffia (Bologna University)**
- Alexander Pyattaev (TUT)
- Vladimir Sayenko (KTURE)
- Marina Turenko (FRUCT)
- **Dominici Michele (INRIA)**

Smart Space Working Group Projects: Smart Conference Service Suit

- Core SmartConference system (**SPIIRAS**)
- Integration of Blogging for conference discussions (**PetrSU, SPbETU**)
- Web extensions for Smart Conference System (**SUAI**)
- Smart Conference Clients for Symbian and Android (**YarSU**)
- Pecha Kucha for Smart Conference (**YarSU**)
- HiveMind for SmartConference system (**YarSU**)
- ECG/Pulse Monitoring for Smart Conference System (**YarSU**)

Smart Space Working Group Projects: Other Projects

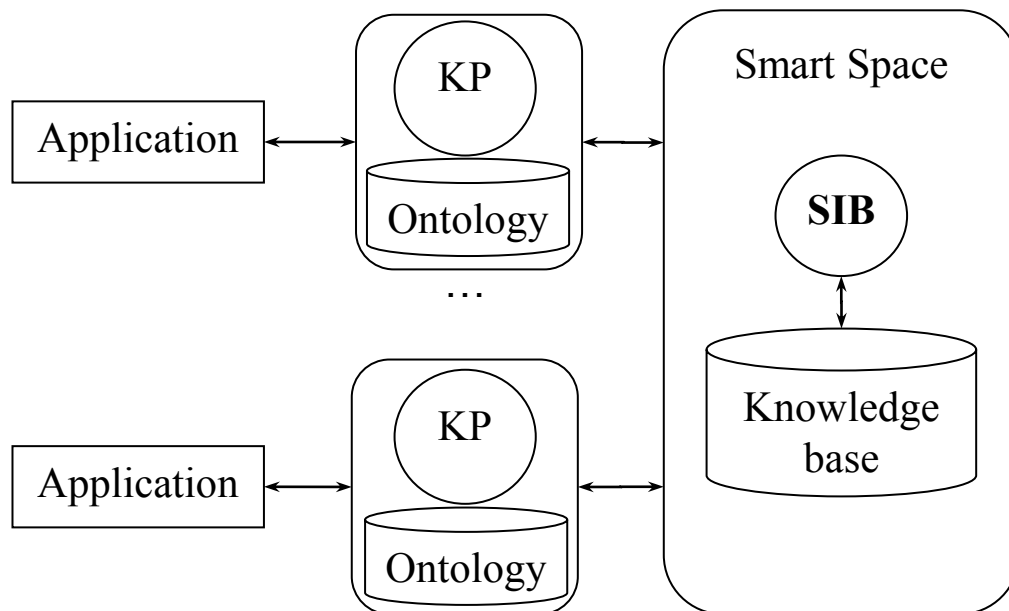

- **PetrSU, SPbETU, UniBo:**
 - Smart-M3 platform development
- **SPIIRAS:**
 - SmartLogistics system
 - Audio-visual support system for Mobile E-meeting Participant
- **PetrSU:**
 - SmartScribo: A Blogging Application for Smart Spaces
 - M3-Weather: A Smart-M3 Forecast Widget for Mobile Users (**completed**)
 - SmartSlog: A Smart-M3 Multilingual Ontology Library Generator
- **SPbETU:**
 - Integration Smart conference and live journal
 - Geo2Tag
- **SUAI:**
 - Academic Social Network
 - System analyzing pedestrian movement in city environment (**on hold**)
 - Building a Model of a Smart City (**on hold**)
- **UNIBO:**
 - C# KPI for Smart-M3 (**on hold**)
 - Smart Space Control Panel (**on hold**)

Smart Conference: Smart-M3 Platform Overview

- Smart-M3 includes:
 - SIB: Devices and software entities (applications) can publish their embedded information for other devices and software entities through simple, shared Service Information Brokers.
 - The interface for managing information in the SIB is provided by Knowledge Processors (KP)
- The understandability of information is based on the usage of the common RDF ontology models and common data formats.

- Smart-M3 allows user KP to:
 - add,
 - remove,
 - change, and
 - subscribe,on information in SIB.

Smart Conference: Introduction

- Intelligent system based on Smart-M3 platform for automation of the conference management processes
- It provides conference participants with the following possibilities:
 - control of presentations using mobile devices without any connection cables;
 - change profiles using mobile devices and share it to the smart space;
 - access information about another participants (information on profiles and presentations);
 - independent browsing of presentations of other participants;
 - see current presentation on the projector screen and on the own mobile device;
 - see conference agenda on the whiteboard screen and on the mobile device;
- Also the system includes automated scheduling system which shows remaining time for the current participant and reminders to presenters when the presentation time is over

information filled the
same way

A screenshot of a mobile application interface for managing a user profile. The screen is titled 'Profile' and is divided into two main sections: 'Personal' and 'Presentation'. On the left, there is a 'Photo' section with a small portrait of a man and a 'Refresh' button with a circular arrow icon. The 'Personal' section contains fields for Name, E-mail, Phone, Interest, Language, and Type. The 'Presentation' section contains a field for Photo Url. At the bottom right, there are 'Save' and 'Cancel' buttons. The 'Photo Url' field contains the text 'http://192.168.0.195/kashevnik.jpg'.

Personal	Presentation
Name:	Alexey Kashevnik
E-mail	alexey@iias.spb.su
Phone	+7(812)328-80-71
Interest	Smart Space WG, Smart-M3, SmartC
Language	English
Type	Speaker
