# Problems to be solved in Medicine

- Raising the cost of healthcare

# Average cost of healthcare in 6 European countries as % of their GDP

Gartner report, 2009

# Condition

- Senile cataract
- Breast cancer
- Prenatal care
- Low back pain
- Coronary artery disease
- Hypertension
- Congestive heart failure
- Cerebrovascular disease
- Chronic obstructive pulmonary disease
- Depression
- Orthopaedic conditions
- Osteoarthritis
- Colorectal cancer
- Asthma
- Benign prostatic hypertrophy
- Hyperlipidemia
- Diabetes mellitus
- Headache
- Urinary tract infection
- Community acquired pneumonia
- Sexually transmitted disease
- Peptic ulcer disease
- Atrial fibrillation
- Hip fracture
- Alcohol dependence

**Closing the Gap**

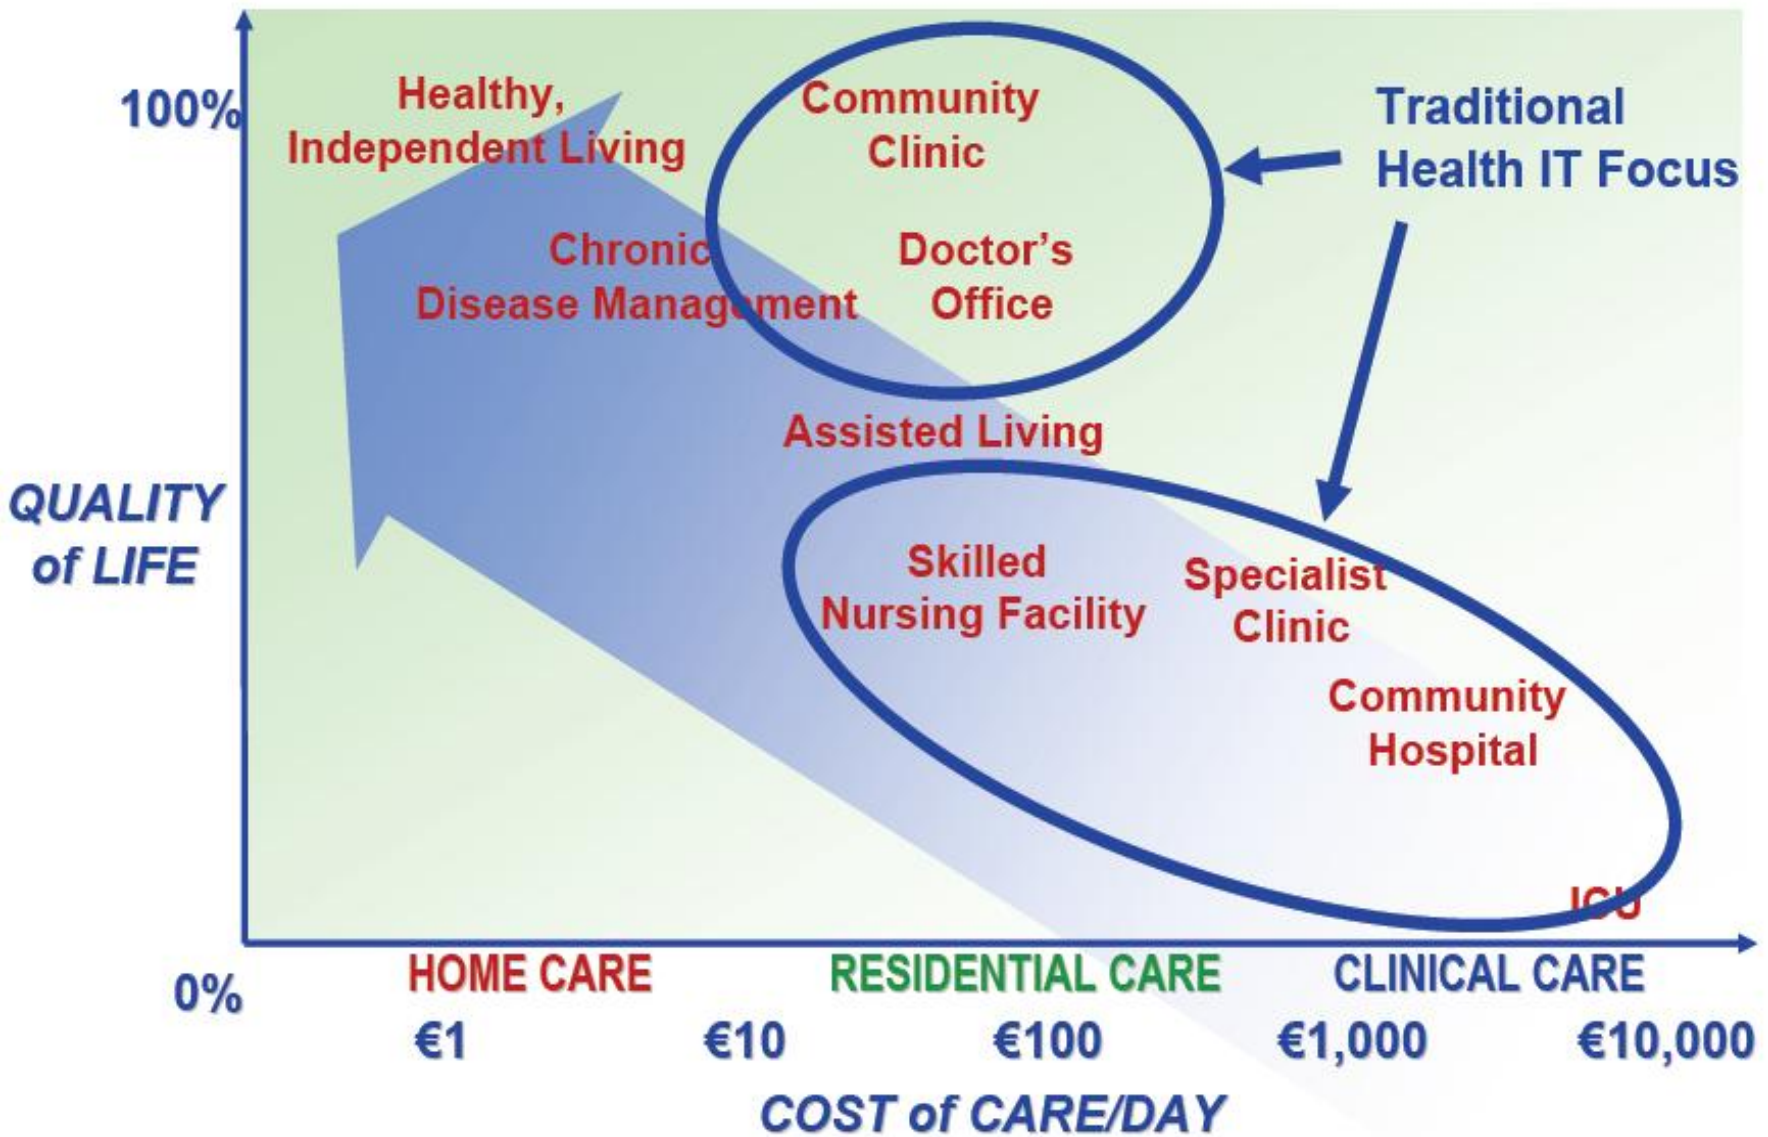

*US data collated by Professor Bill Runciman, President, Australian Patient Safety Foundation from McGlynn et al; NEJM 2006 Vol 348; p2635-45*

**Percentage of Recommended Care Received**

**Rising toll.** Between 2008 and 2030, the World Health Organization projects that the burden of non-communicable diseases will continue to rise, even in the poorest countries.

# Health and Social Care Costs

**To treat patient at home – we need  
feedback from the patient**

# Problems to be solved in Medicine

- Raising the cost of healthcare
- Ageing of population

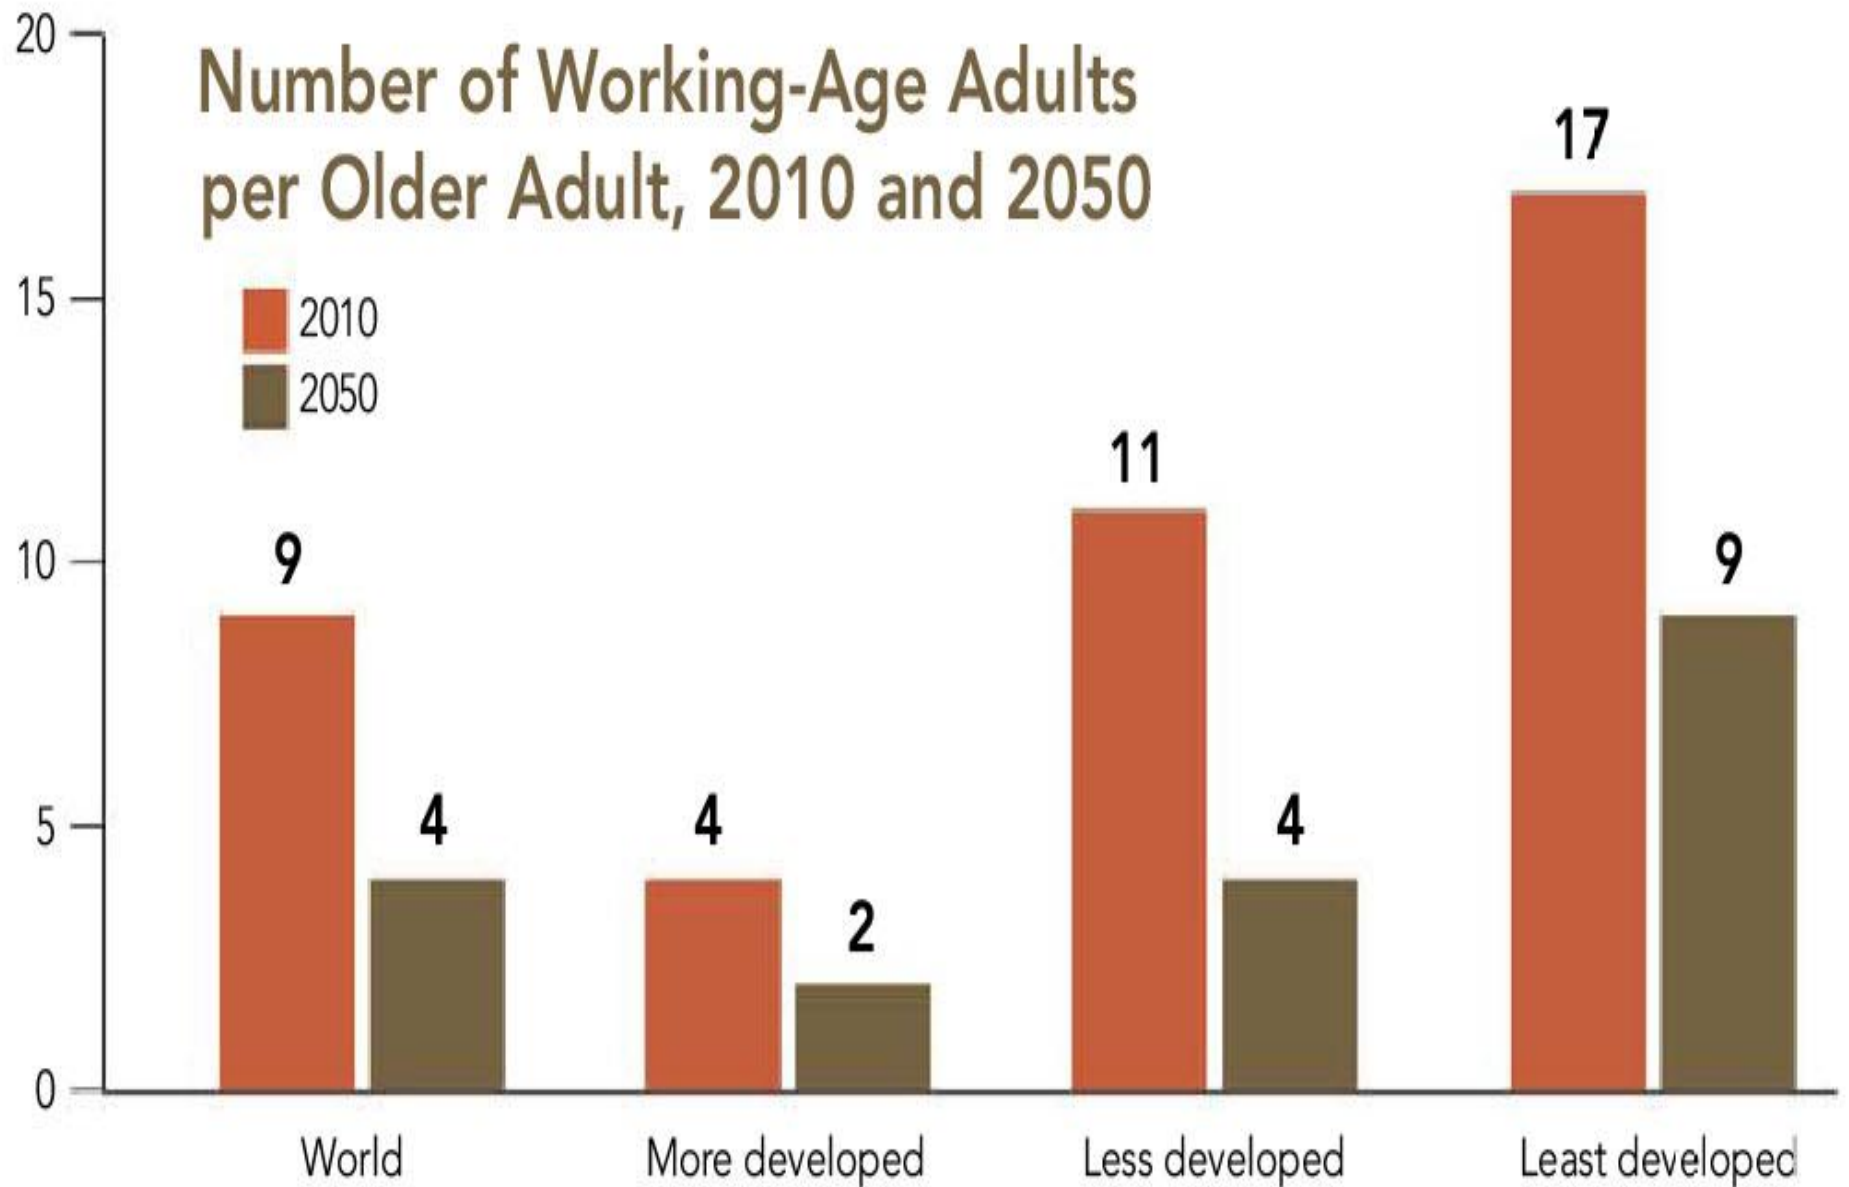

## Trends in Life Expectancy at Birth, 1950 and 2010

## Number of Working-Age Adults per Older Adult, 2010 and 2050

2010  
2050

## Соотношение трудоспособного населения и пенсионеров

Именно поэтому в 2002 году в нашей стране стартовала пенсионная реформа,

**Unprepared.** Many developing countries lack the resources to effectively treat renal failure, diabetes, cancer, and other debilitating NCDs.

**Can we get responsible old patient – no way!**

**What does healthcare need to encourage citizens and patients to follow healthy style of life, screening of their health status, and provide feedback to the healthcare provider?**

**Simple,**

# BENEFICIAL EFFECTS OF EXERCISE

↓ abdominal adiposity  
improve weight control

↑ mitochondriogenesis  
↑ oxidative fiber type  
↑ fatty acid oxidation  
↑ in aerobic capacity

↑ psychological well-being  
↓ anxiety and depression  
↑ expression of neurotrophic factors  
↑ memory and cognitive function  
↑ quality of sleep  
↓ mental decline that comes with age  
↑ neurogenesis

↑ coronary blood flow  
↑ cardiorespiratory function

↓ Triglyceride levels  
↑ HDL  
↓ LDL  
↓ Blood pressure  
↓ Blood coagulation  
↑ Endothelial function  
Improve glucose homeostasis  
Improve insulin sensitivity

# How can we push person to move more?

- To count the amount of movements
- To inform person about every day results
- To put goals (targets) for improvements

## Использование mywellness key совместно с инвентарем Technogym

- Вы можете в меню **Ваши тренировки** создать новую тренировку, основанную на использовании доступного для вас спортивного инвентаря Technogym
- С вашего ПК вы можете получить доступ к результатам тренировок, созданных и заданных вашим клубом и выполненных в клубе
- Вы можете вручную вводить в **Календарь** информацию о тренировках, выполненных на тренажерах Technogym, но не зафиксированных вашим mywellness key
- Если вы продвинутый пользователь mywellness key, вы можете получить доступ к меню **Расширенные функции** и установить персонализированные цели на вашем mywellness key

# Sign on the elevator doors at TechnoGym

# Attention to the details (CDC Guidelines)

**"I feel stronger and better about myself since I started walking every day."**

## Other Safety Tips

- Keep emergency numbers in large print near each phone.
- Put a phone near the floor in case you fall and can't get up.
- Think about wearing an alarm device that will bring help in case you fall and can't get up.

**How much should the person to exercise,  
what is the right dose of this remedy?**

**Heart rate correlates with the intensity  
of exercise.**

**Safe level of exercise intensity is  
determined by the maximal HR  
 $220 - \text{age (in years)}$**

## *Bluetooth Heart Rate Monitor.*

"People who are really serious about software should make their own hardware." - Steve Jobs quotes Alan Kay at the MacWorld 2007.

Blatand offers a worldwide unique chest strap for heart rate monitoring. The chest strap communicates via Bluetooth short distance radio with your mobile phone or other end devices, e. g., the Bluetooth access point at a gym, a home computer or the rehab staff's PDA.

It is convenient, persistent, interference-proof, tap-proof and less expensive than conventional products.

# Radar for remote measurement of breath and a heart activity

## Characteristics

Duration of a pulse 200 ps;

Average power  $< 0.04 \mu\text{W}$ ;

Range of action: 0.02- 5 m;

Density of a flow emission power  
less than  $0.1 \text{ mW}/\text{cm}^2$

# Output signal of radar during breath and when breath is stopped

# Implantable RFID-based sensors

The CardioMEMS Interrogator cart contains a 15" touchscreen monitor and lightweight, ergonomically designed Antenna. During the EVAR procedure, the cart's Antenna transmits RF energy to the sensor. The circuit inside the sensor is charged by the RF energy. The sensor returns a resonant frequency signal back to the Antenna, which is translated by the electronics to a pressure measurement.

**TELLTALE HEART MONITORING:** This small sealed sensor keeps tabs on artery pressure in heart failure patients, transmitting information wirelessly to doctors.

## Standard solution for medication monitoring

The CEM083 is a designed as a single component for inclusion in pharmaceutical

### **Configuration and self-test**

Configuration is done by software which is programmed into the chip using the RFID capabilities of the CPK082. Customization may be done either during manufacture and/or prior to use by a pharmacist or care provider.

The module provides a self-test capability that may be used in manufacturing and in the market to ensure that it is functioning correctly.

### **RoHs**

The CEM083 is RoHs compliant.

**Message 1:**

**We need  
Green Light  
for remote  
monitoring  
of our health  
conditions**

## Message 2:

Healthcare is interested not in results of single measurement (flirt),

but in results of ‘sustainable relationships’ with the monitoring system.

Healthcare is interested in changes in your conditions.

We are searching for change.....
