Petrozavodsk State University
Department of Computer Science

This project is supported by grant KA179 of Karelia ENPI - joint program of the European Union, Russian Federation and the Republic of Finland

11th FRUCT conference
April 23–27, Saint-Petersburg, Russia

Personalisation

- Feeling difference
- Individuality
- Feature

CDS — context desktop for Symbian.

Periodically update desktop, by using context.

Context

- Season (winter, spring, summer, autumn)
- Time of day (morning, day, evening, night)
- Weather
- Location (gps coordinates of device)

How it works?

- Receive the coordinates
- Determine the weather
- Create an image
- Set as wallpaper

Image creating

How it looks?

Platform and toolbox

- Symbian OS (Symbian Anna, Belle)
- Qt framework (Daemon process)
- QML (GUI)

Future

- Custom themes
- Image service
- Other platforms
- Nokia Store <http://store.ovi.com/publisher/FRUCT>
- To appear in the list of the projects <http://oss.fruct.org/projects>

Try it on your device!
