

Geo-coding and Smart Space Platforms Integration Agent

Kirill Yudenok, LETI, FRUCT OSLL

kirill.yudenok@gmail.com

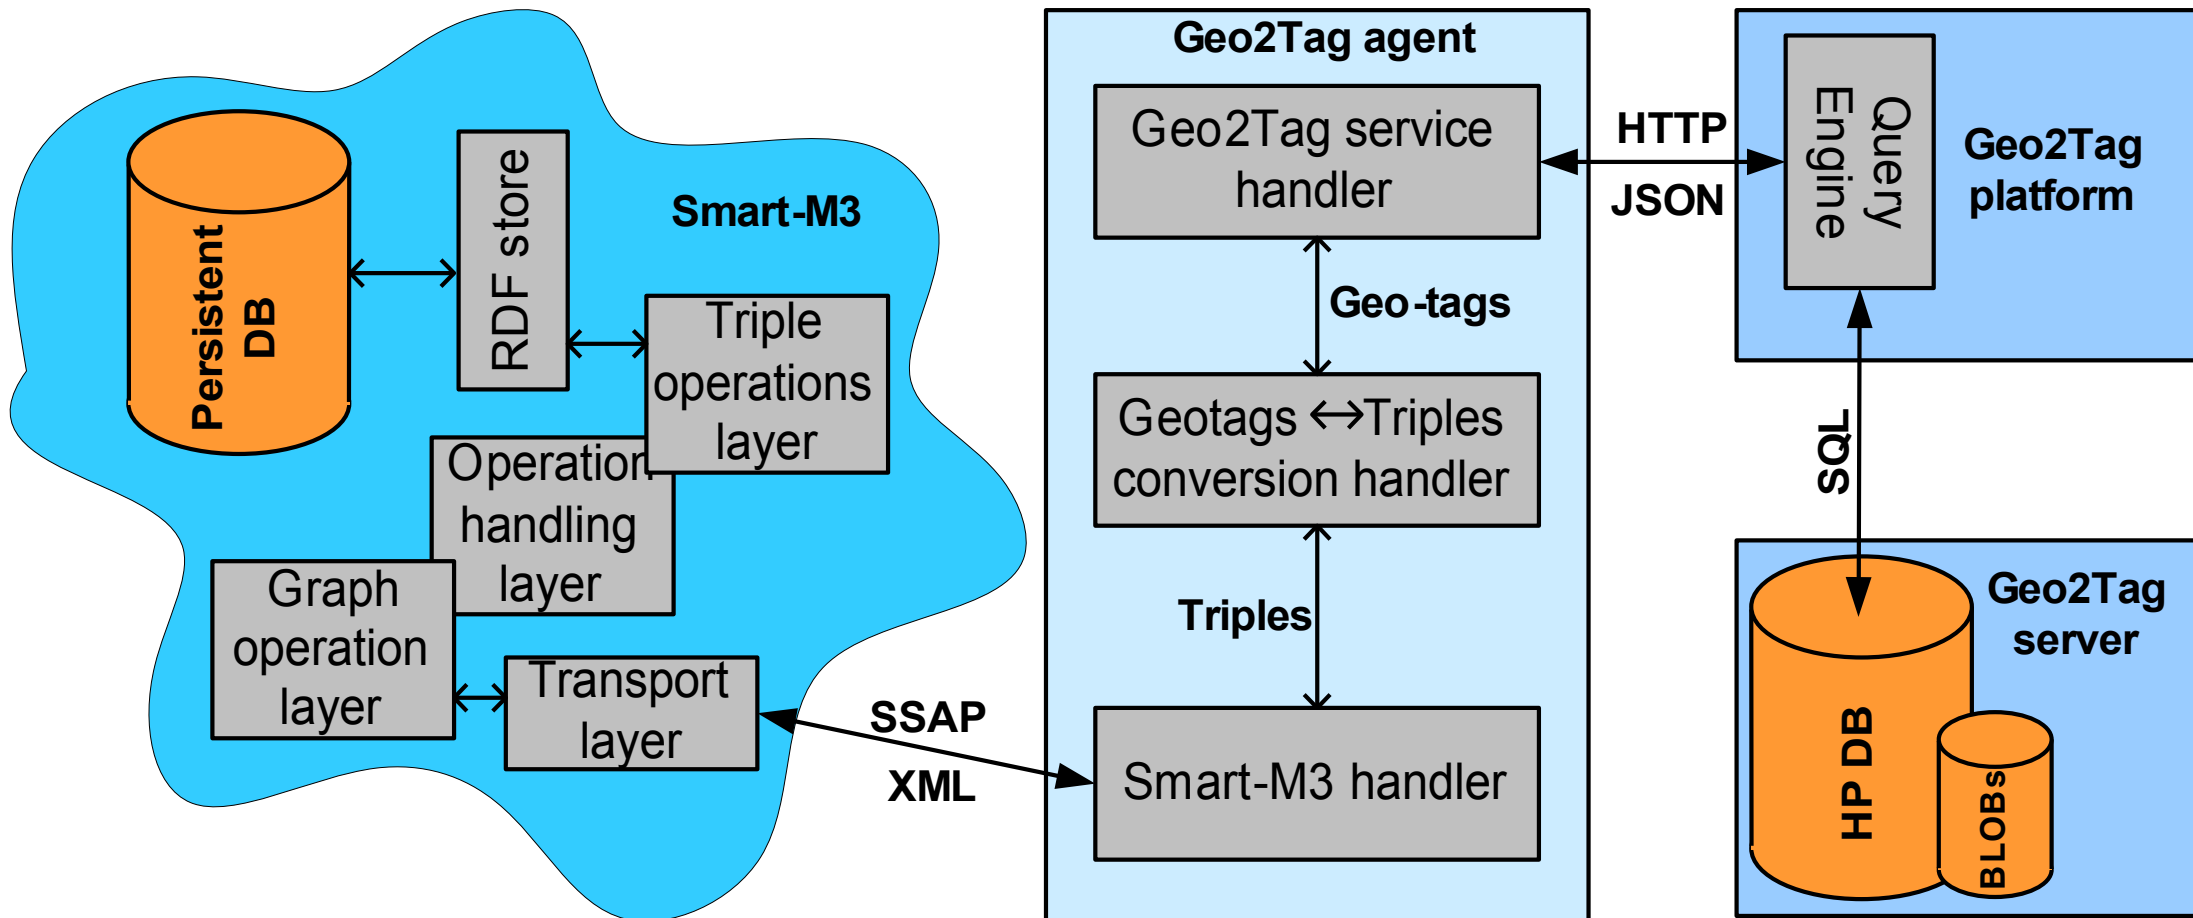

One of the project use-case

Project technologies

- Two main technologies of the project:
 - Location-based services – Geo2Tag platform;
 - Smart Spaces – Smart-M3 platform.

Platforms integration

Main use-cases possibilities

- Pro-activeness and context-awareness;
- Machine-to-Machine (M2M) interactions;
- Geo2Tag and Smart-M3 functionality (filters);
- Semantic information search;
- Privacy and security;

Proof-of-concept scenario

Show how works basic mechanisms of platforms integration agent and it's analysis.

- Scripts/Tests for all basic integration agent operations (mechanisms);
- Performance testing results and it's analysis.

Welcome to stand for more information!
