

## Demo for **FRUCT 9**: Smart Board for MeeGo with Smart-M3 platform

Smart Board is part of a common smart space where users can share announcements, publish it and track their timely appearance.

Smart Board uses the basic capabilities of the smart space library Smart-M3.

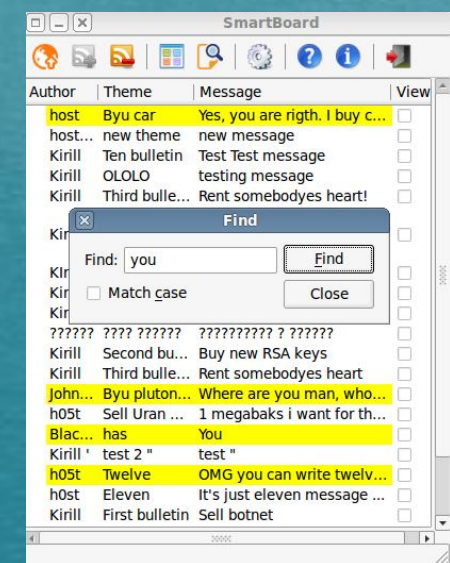

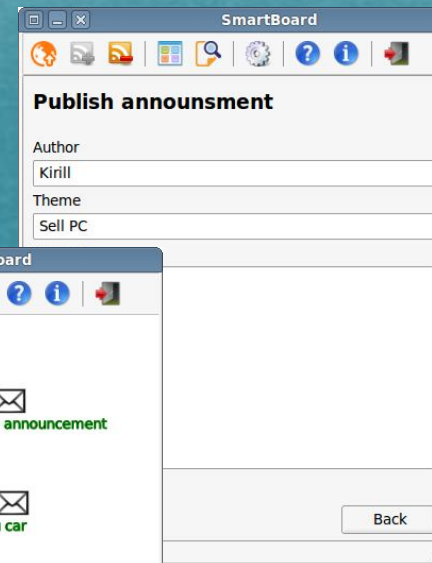

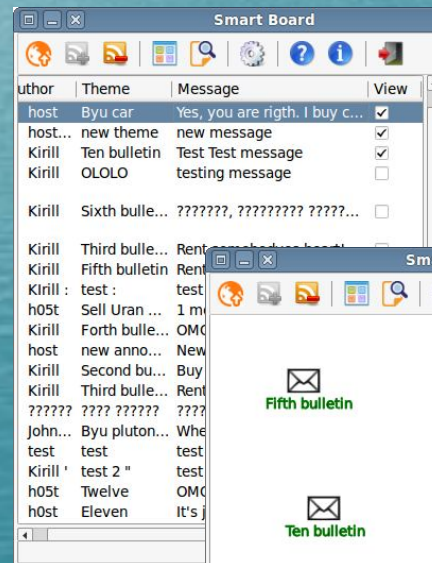

### **Progress:**

- Smart-M3 client-side libraries moved to MeeGo platform.
- Extended Smart-M3 functional library, that is responsible for connecting and configuring the parameters of SIB.

**It became possible to connect and work with  
several SIB.**

# Smart Board demo

- Publication of announcements;
- Displays a list of all published announcements;
- Graphical view of all selected announcements;
- Obtaining information on each announcement;
- Search data in announcements.
